

# NAWBAHAR TECHNOLOGIES

## Capability Statement

UEI: Y8EKR6P1NVF4  
CAGE: 1A713

Nawbahar Technologies develops mine countermeasures (MCM) operational support equipment and maritime deployment solutions for expeditionary defense applications.

### KEY PRODUCTS

Dog Bone Deployment Buoy – Low-profile flotation and controlled deployment solution for maritime and mine countermeasures operations

Floating Fuse Mat – Controlled staging and management of non-electric firing systems for maritime and expeditionary operations

#### Core Capabilities

- Mine countermeasures operational support equipment
- Low magnetic signature (Lo-Mu) equipment design
- Non-explosive demolition accessories
- Flotation and deployment systems

#### Differentiators

- Nearly 20 years of EOD, MCM, and subsurface maritime operations experience
- Rapid concept-to-prototype development cycles
- Operator-informed design approach
